**Tennessee Code Annotated § 68-102-133**

The commissioner shall, annually, on or before February 15, transmit to the governor a full report of the commissioner’s proceedings under this chapter, and such statistics as the commissioner may wish to include in the report, for the year previous. The commissioner shall also recommend any amendments to the law that, in the commissioner’s judgment, are deemed advisable. The report of the commissioner shall include a full and complete report of all collections made and all expenditures and for what purposes they were made and to whom paid.

---

**Overview of State Fire Marshal’s Office Operations**

The mission of the Division of Fire Prevention, known as the Tennessee State Fire Marshal’s Office (SFMO), is to reduce the loss of life and property from fire. The SFMO and its seven sections are committed to protecting the safety of Tennesseans and their property. Each section of the SFMO incorporates one or more of these core functions which aligns focus and provides vision for the future.

The Education and Outreach section assists the fire service, elected officials, and the communities they serve to realize the potential economic incentives of prevention by analyzing data to identify trends and develop targeted messaging. To reduce the susceptibility of buildings to fire, the SFMO works to ensure engineered environments are designed and constructed to applicable code standards through the Codes Enforcement section, the Electrical, Residential and Marina Inspections section, and the Manufactured Housing and Modular Building section. The Tennessee Fire Service and Codes Enforcement Academy (TFACA) and the Commission on Firefighting Personnel Standards and Education (Commission) are tasked with training and certification of firefighters which serves to promote professionalism and competency. Lastly, the Administrative Services section provides support for the SFMO overseeing the processing of over 20 types of permits, licenses, and certificates.

**Fire Prevention Division Sections**

- Education and Outreach
- Codes Enforcement
- Electrical, Residential and Marina Inspections
- Manufactured Housing and Modular Building
- Tennessee Fire Service and Codes Enforcement Academy (TFACA)
- Commission on Firefighting Personnel Standards and Education (Commission)
- Administrative Services
State of the State

Tennessee has historically ranked among the highest states in the country in its rate of unintentional civilian fire deaths. The SFMO is committed to reducing the loss of life and property due to fires by focusing on education, codes enforcement, inspection, and regulation. Like most of the United States, Tennessee has experienced a reduction in fire deaths over the past several decades due, in part, to these programs. In 2022, Tennessee recorded a fire death rate of 12.6 per million, which is an improvement over the previous 5-year average of 14.9 deaths per million.

The preliminary 2022 fire data shows a 16.8% decrease in unintentional civilian fire deaths from last year. According to SFMO records, there were 89 such fire deaths in Tennessee during 2022, which is down from the 107 fire deaths the previous year. The overall trend of fire deaths since 2007 has been slightly downward.

![TENNESSEE CIVILIAN FIRE DEATHS](image)

Most unintentional civilian fire deaths occur in residential structures. More than three quarters of the fire deaths in 2022 occurred in single-family homes which is consistent with previous years. From 2017-2022, 79.8% of fire deaths occurred in single-family homes.

Fire departments reported 8,201 structure fires which is a slight decrease from the 8,429 structure fires reported in 2021. Although, it should be noted, the number of reported fires is expected to marginally increase as fire departments continue to submit reports from the 2022 calendar year during the first part of 2023.

The adjacent table represents all incidents and dollar loss as reported to the Tennessee Fire Incident Reporting System (TFIRS) for the 2022 calendar year. The data contained in the table is considered preliminary until April 2023 to ensure that all fire reports are complete.

The 27,288 total reported fires caused an estimated $463.7 million in property loss for Tennesseans last calendar year. These loss estimates are from incident reports submitted by fire departments. As with the structure fire data, the SFMO expects this number to increase slightly as fire departments are still submitting and updating incident reports. The preliminary estimate of $456.5 million in property loss from structure fires in 2022 is up significantly from the $307.5 million reported in 2021.

### Fire Department and Firefighter Statistics

The SFMO recognizes a total of 699 fire departments. Based on information provided by those fire departments, 75.1% of the fire departments in Tennessee are comprised entirely of volunteers, 8.0% identifying as career fire departments, and the remaining 16.9% of fire departments are staffed by a combination of volunteer and career firefighters. Most firefighters in Tennessee are volunteers who receive either no compensation or a nominal fee for their services.

The SFMO estimates there are 19,510 active firefighters in Tennessee. Fire departments reported 8,281 career firefighters which comprises about 42.5% of all firefighters in the state. Determining the number of volunteer firefighters is complex as fire department rosters are subject to change often, and firefighters may volunteer for multiple departments. There are approximately 11,229 volunteer firefighters which is 57.5% of the fire service in Tennessee. Of these 11,229 volunteer firefighters, an estimated 2,301 receive a small payment or stipend for responding to emergency calls.
Education and Outreach Section

The Education and Outreach section provides fire safety resources to the citizens, and fire departments of Tennessee. The programs of this section include fire data analysis, fire department recognition, public education, and community risk reduction. The section works with partners at both national and local levels to share the latest information in fire prevention.

A highlight of this area is the “Get Alarmed Tennessee!” program, which this year celebrated 10 years of providing free smoke alarms to fire departments and volunteer organizations for installation in Tennessee homes. Since “Get Alarmed Tennessee!” started in 2012, at least 385 residents have been alerted to fires in their homes and escaped without serious injury due to smoke alarms installed through the program. In 2022, the program worked through partners across the state to distribute 20,175 free smoke alarms.

In 2022, the section continued to deliver custom community risk assessments and community risk reduction workshops for fire departments. There were 46 fire departments who submitted community risk reduction plans to the SFMO based on these risk assessments with 7 of these departments applying for the SFMO’s Excellence in Community Risk Reduction Award. Sevier County Fire and Rescue was selected by a panel of national experts as the winner of the award for their commitment to preventing and mitigating risks to life safety and property in their community.

Throughout the year, the SFMO visited volunteer fire departments monthly to donate rehabilitation supplies and gather feedback on how to best assist. In 2022, the SFMO met with 41 volunteer fire departments, including a trip in October to departments in three counties during Fire Prevention Week. These visits concluded a statewide tour of volunteer fire departments in each of the 95 counties to highlight Governor Lee’s support of the volunteer fire service. These events have provided key insight to the fire departments while connecting state and local officials to critical information about the needs of the volunteer fire service across the state.

Codes Enforcement Section

The Codes Enforcement section enforces statewide adopted fire and building construction safety codes to afford a reasonable degree of safety to life and property from fire. This section oversees the design, construction, alteration, and repair of buildings or structures across the state. These types of buildings or structures include state buildings, commercial residential structures, high hazard occupancies, jails and prisons, covered malls, assembly spaces with 300 or greater occupants, schools, and daycares. The section also conducts annual inspections for schools, daycares, and other buildings requiring an inspection from the SFMO to receive an initial license from the Administrative Services section and other state agencies.

This section investigates complaints relating to buildings, licensees, or entities licensed by the Administrative Services section. The section conducts safety inspections at annual and seasonal fireworks locations as well as the review of all public fireworks displays to ensure a reasonable degree of safety.

Plans Review and Inspections in 2022

- Plan Submittals Received: 839
- Total Inspections Performed: 16,646
- Schools Inspected: 1,550 (75 Schools Inspected in Distressed Counties)
- Annual Fireworks Retailers Inspections: 79
- Seasonal Fireworks Retailers Inspections: 864
- Public Fireworks Displays Reviewed: 407
Electrical, Residential and Marina Inspections Section

The Electrical, Residential and Marina Inspections section is responsible for critical safety inspections in Tennessee. This section issues permits and performs inspections to enforce the provisions of the adopted electrical code, residential building code, and energy conservation code.

This section investigates complaints that are received by the SFMO, which often requires immediate attention due to the severity of the life safety concern. The work of this section plays a critical role in fulfilling the mission of the SFMO as the safety of residential structures and all electrically engineered environments are a cornerstone to fire prevention.

In 2022, this section celebrated the two-year milestone for the launch of the online permitting system that modernized the electrical and residential permit purchasing and inspection process. Mobile inspections and online permitting have drastically reduced the amount of time in permit issuance and receipt, making it virtually instantaneously. Since the launch of the system, an average of 75% of all electrical permits have been sold through the online permitting system which saves consumers in fees collected by physical selling locations. This year the online permitting system has saved customers $1,790,050 in fees.

Permits and Inspections in 2022

- Total Residential Building Permits Issued: 1,486
- Total Residential Building Inspections Performed: 5,257
- Total Electrical Permits Issued: 185,608
- Total Electrical Inspections Performed: 300,254
- Total Marinas Inspected: 28

Manufactured Housing and Modular Building Section

The Manufactured Housing and Modular Building section administers portions of the Uniform Standards Code for Manufactured Homes Act related to the U.S. Department of Housing and Urban Development (HUD) Labeled Manufactured Homes and the Tennessee Manufactured Home Installation Act. The section assists with consumer complaints and dispute resolution which are two processes designed to provide direct assistance to any consumer that has safety concerns or feels they have been provided a defective product. This section is responsible for licensing functions and oversees the inspection of installing new and used manufactured homes.

Statutorily, this section, is required to ensure that at least 5% of the manufactured homes installed in the state are inspected each year. Manufactured housing continues to be an affordable means of housing nationwide, especially in Tennessee. Installation programs place an emphasis on distressed counties with a goal to inspect 70% of installations inside these counties. With this goal, the program ensures adequate coverage in these counties to deter the possibility of unsafe installations and consumer scams. Of the 287 reported installations in distressed counties, 229 (80%) were inspected by the section which exceeds the inspection goal.

Inspections and Activities in 2022

- Floors Inspected in Plant: 24,076
- Consumer Complaints Resolved: 11
- Installations: 4,364 (287 Installations in Distressed Counties)
- Installations Inspected: 2,912 (229 Installations Inspected in Distressed Counties)
- Modular Labels Sold: 3,400
- Modular Plans Reviewed: 846
Tennessee Fire Service and Codes Enforcement Academy

The Tennessee Fire Service and Codes Enforcement Academy (TFACA) plans, develops, and facilitates educational training programs to promote the professionalism and competency of fire service and codes enforcement personnel through a standardized statewide program. These programs enhance the individual and collective ability of those in the fire service to protect the life and property of Tennesseans. TFACA’s focus on both fire service and codes enforcement establishes it as a regional center for the training and testing of codes enforcement officials, firefighters, and other homeland security first responders.

TFACA continues to serve as the premiere training grounds for fire and codes events with improvements to equipment and campus underway. These upgrades will provide a more realistic environment for students to train so that they are better prepared to respond to incidents or conduct inspections.

Training and Activities in 2022

- Total Students Enrolled: 16,080
- Total Classes Conducted: 1,093

Commission on Firefighting Personnel Standards and Education

The Commission on Firefighting Personnel Standards and Education (Commission) is responsible for the certification of career and volunteer firefighters in Tennessee. The certification program is designed to incentivize firefighters to further develop skills through education and demonstration of the knowledge through certification levels offered by the Commission.

The Commission manages and administers the daily operations for the Educational Incentive Pay (EIP) program which provides an $800 supplement to career firefighters who complete a minimum 40 hours of annual training at an accredited program. Passed by the General Assembly in 2021, the Commission now administers the volunteer firefighter Educational Incentive Pay (VEIP) program for volunteer firefighters which provides a $600 supplement to volunteer firefighters who complete a minimum of 30 hours of annual training. The first year of supplements were paid to volunteer firefighters in 2022 with 1,369 volunteer firefighters qualifying for payment.

Testing and Activities in 2022

- Total Exams Administered: 10,031
- Total Number of Test Events: 489
- EIP Total Number of Qualifying Firefighters: 6,995 ($800 each; totaling $5,596,000)
- VEIP Total Number of Qualifying Volunteer Firefighters: 1,396 ($600 each; totaling $837,600)
Administrative Services Section

The Administrative Services section provides administrative support for the SFMO in the areas of budgeting, purchasing, and personnel management. The section ensures that qualified applications are properly processed and issues over 4,500 professional permits, licenses, and certificates of registration.

The section specifically processes regulatory permits, licenses, and certificates of registration for the certified inspector program, explosives, fireworks, fire extinguisher, fire sprinkler, and liquefied petroleum (LP) gas industries. Additionally, the section processes complaints for related licenses and refers violations to the Legal Division for potential disciplinary action.

Permits, Licenses, and Certification Programs in 2022

Below are the number of regulatory applications processed and individuals/entities licensed during the year 2022.

**Portable and Fixed Fire Extinguisher Systems**

- Firms: 177
- Branches: 12
- Specialists: 548
- Technicians: 55

**Liquefied Petroleum (LP) Gas**

- Dealers: 498
- Managers: 19
- Responsible Managing Employee: 34

**Fireworks**

- Annual Retailers: 79
- Seasonal Retailers: 864
- Operators: 164
- Exhibitors: 17
- Display Permits Issued: 407

**Fire Protection Sprinkler Systems**

- Contractors: 215
- Responsible Managing Employee: 269

**Certified Inspectors (Fire, Building, Mechanical, and Plumbing Inspectors; Electrical Inspectors)**

- Inspectors: 457
- Certified Electrical Inspectors: 31

**Explosives**

- Firm: 45
- Handlers: 471
- Blasters: 189
- Limited Blasters: 10

**Fire Safe Cigarettes**

- Manufacturers: 19
SFMO/Division of Fire Prevention Operating Cost
